## EDUCATION

**Faculty of Computer and Data Science,** Alexandria — *Bachelor*

SEP 2025 - 2029 (expected)

## PROJECTS

### Just Dashboard — *Next.js Developer Friendly Dashboard*

Designed & Developed a modern admin dashboard template for developers who want to build robust management systems quickly and efficiently. Built with Next.js, TypeScript, Tailwind CSS, and daisyUI, this template offers a clean user interface, **35+** modular components, and **20+** ready page patterns for handling orders, reservations, and more.
– Oct 2025

### Fish Finder

Fish Finder is a lightweight web app that helps you explore a collection of 3D fish models and related assets using three.js library, also designed ModelLoader class to make the code cleaner and more organized.
– Oct 2025

### GLB To Image

Developed a small client-side web app that allows users to upload GLB/GLTF 3D models, preview them interactively, and capture/export images from the viewport.
– Oct 2025

### My Shelf

Built My-Shelf, a books management web application that provides an interface to view, search, and add books using their ISBN. It fetches book details from the ISBN Search API and stores data locally for offline access.
– Sep 2025
